

GAGAN

Physics Tutor

Education

University of Oxford: BA Physics (2017-Present)

A-levels: Maths, Further Maths, Physics, Chemistry – A*A*A*A*

Teaching Experience

I have been tutoring for several years, helping multiple students with A-Level Physics and Maths. I've also been tutoring the PAT (Physics Aptitude Test) for three years, with a pass rate far above the national average and over 50% going on to successfully secure an offer from Oxford or Cambridge.

Testimonials

“Explains all physics concepts really well, he has a really deep understanding of physics of course. He knows all the equations and their derivations. Can explain the answer to the same question in multiple ways. Great tutor.” – A Level Physics Student

Physics Tuition Approach

I'm flexible in how I teach; whether you need help with tactics for exams, or to get better with a specific topic. I want to map out what you want to achieve, and exactly how to get there - moreover I want to push you beyond what you think you're capable of. Once we've set our targets, I'll help understand exactly what you find most difficult, and then make sure that we work through those pain points in the most effective way possible by designing my class in advance. By going over what we've learnt at the end of each session with time for questions, I'll make sure that you deeply understand topics - not just at a surface level, making sure you're ready for anything the exams can throw at you.
