

CALUM

STEP Tutor

Education

University of Cambridge: BA in Mathematics 2016 - 2019 (Upper Second Class)

STEP results: STEP I: S (117), STEP 2: 1 (89), STEP 3: S (101)

A-levels: Maths (A*), Further Maths (A*), Physics (A*), Chemistry (A), Geography (A)

Teaching Experience

I have been tutoring Mathematics for over 5 years across all levels from GCSE Foundation tier all the way up to STEP, and have a large amount of experience tutoring online. I have worked with students from outside of the UK wanting to sit the STEP papers so I am used to adapting my style of teaching to work around different syllabuses to ensure the students will not be disadvantaged when sitting the exams.

STEP Tuition Approach

In preparing for the STEP papers it is important to do as many of the past paper questions as possible across the three sections. This ensures that the student will be able to open the paper and make an informed decision about what questions they'll target in order to maximise their result. In order to prepare the student for the exam it is crucial to encourage independent and out-the-box thinking; hence too much hand-holding throughout the lessons is not beneficial. Instead I provide smaller hints and tips to push the student in the right direction. However I will also be prepared to give partial/full solutions to maintain the fluidity of the lesson and to encourage the student.
