

TEODORA

MAT Tutor

Education

University of Oxford: MComp Computer Science (2017 - 2021)

Romanian Bacalaureate: Maths (10/10), Computer Science (10/10), Romanian Language (8.95/10)

Teaching Experience

I have been tutoring for more over two years, helping students get a better understanding of Maths and Computer Science. I have tutored a range of students, from GCSE and A-level, to helping students prepare for the MAT admissions test. With more than 250 hours of teaching and a track record of great reviews, I am always excited to help students and provide them with the explanations they need to succeed.

Testimonials

“Teodora is always there to explain in detail and help the student understand whatever they are having trouble with. she's helped me a lot in understanding the basics for my computer science exam! totally recommended :)” – GCSE Computer Science Student

“So helpful, really elucidates complex concepts and very friendly! Thank you so much!” – Maths IB Student

“Always helpful and supportive and a great guide through the MAT.” – MAT Student

“Very clear style of teaching. She will make notes as you go along which lets you remember what you were taught. I like the use of diagrams to explain things. Very unique style!” – A-level Computer Science Student

Maths and Computer Science Tuition Approach

Nothing is more thrilling than solving a difficult problem or designing a correct algorithm. I am determined to try and transmit this thrill to my students by working alongside them and helping them achieve their goals.

For any kind of exam preparation, I believe that testing the student in the early sessions will give me an insight of their abilities and knowledge level. Once I have a starting point, I can make a personalised study plan that will make sure every piece of information is covered and understood well by the student. I will give the student homework to make sure that they get enough exercise opportunities and I will quiz them at the end of each chapter to see if the key concepts are clear.

For MAT preparation specifically, my lessons will mostly cover past exam papers and different strategies of approaching a new question. As the MAT questions are nothing like the A-level exams, the resources are limited as well. However, I will make sure that the student gets the best understanding of the methods and, most importantly, the exam strategy that they should adopt on the big day.

As each student is different, the study plans will be created based on the needs and preferences of each student. I want to make this experience as enjoyable as possible for them and this can only be achieved if the study plan includes the student's favourite ways of learning.
