# TOM

*Computer Science Tutor*

## Education

University of Cambridge: BA Computer Science (2016-19)

A-levels: Maths, Further Maths, Physics and Electronics (4 A*)

GCSEs: Maths, Physics, Chemistry, Biology, Electronics, Music, English Language, French (8 A*), English Literature and Geography (2 A)

## Teaching Experience

As a private tutor, I have taught a range of students from Key Stage 1 Maths all the way up to A-Level Maths, including providing coding tuition for mature students. I have also helped students with their Oxbridge Computer Science applications, including in particular preparation for the admissions test and interview.

## Computer Science Admissions Tuition Approach

For admissions prep I will typically assess what areas the student struggles with; do they struggle with difficult questions or certain subject areas, or are they very skilled but do not express their thoughts well? With this in mind, I will conduct most lessons in a style that might be reminiscent of an academic interview, by providing practice questions designed to test the student and steering through them as an admissions interviewer might. I will guide them on where they can improve their interviewing technique, and aim to give more insight into how admissions questions should be tackled.
